

DEFA MultiCharger 1210

Designed to be fitted in large vehicle engine room's f.x. on the frame sidewall. Easy to install and safeguards all along a fully charged battery. Features:

 Modern switch-mode charging electronics, which help to preserve the battery. Therefore, the charger can be permanently connected.

• The temperature-compensated charging voltage en sures that the battery will be fully charged in all conditions.

• LED indicator for charging mode: quick charge mode (red) and trickle charge mode (green).

• If the battery is so heavily loaded during the trickle charging process that the battery voltage drops to below 13V, the charger automatically switches to full-power mode (quick charge mode).

Item number DEFA no: 450011 764 gr. (Incl. cables) Weight: 8 - pack. Packing:

Part of

MultiCharger 1210 is only available as a single unit.

Use & Mounting

MultiCharger 1210 can be used to charge all open or closed types of 12V lead/ acid inclusive AGM and GEL batteries.
